

## INPUT/OUTPUT RAIL JUMPER BAR KIT M/N 45C3

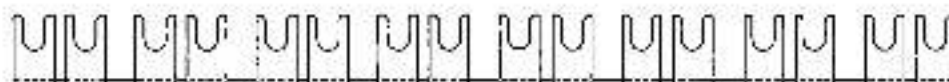

### DESCRIPTION

The Jumper Bar is used to tie two or more terminals together on the terminal strip. Figure 1 shows an illustration of the Jumper Bar. The Jumper Bar can be cut to the desired length that is necessary for the installation.

**Important:** The Jumper Bar must always be installed on the "B" terminal of the terminal strip. The Jumper Bar will not fit on the "A" terminals properly.

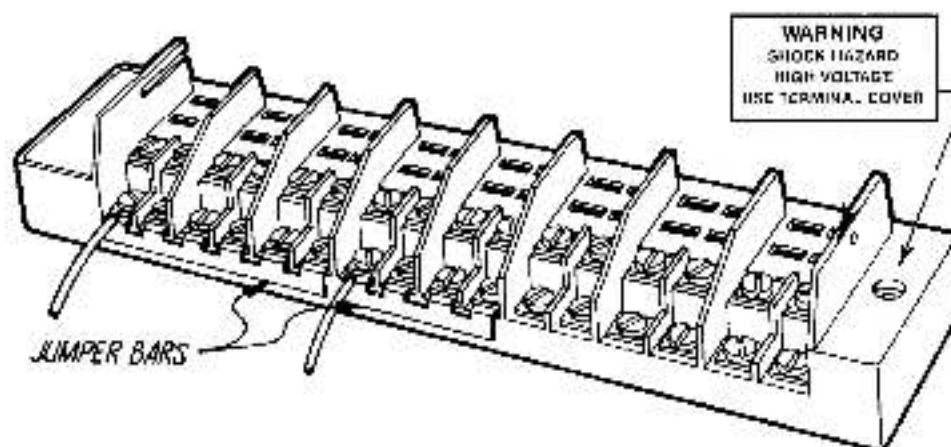

Figure 2 shows the Jumper Bar installed on the terminal strip. When using the jumper to tie terminals together for inputs, the jumper is tying together the commons. When being used with outputs, the jumper is tying the supplied power side together.

**Warning:** Possible shock hazard, high voltage, insure use of terminal cover.

*Jumper Bar — Figure 1*

The warning labels must be installed on the terminal strip when the jumper is used. Refer to Figure 2 for placement of warning label.
