RELIANCE
ELECTRIC

Congratulations!

You've just received the finest industrial controls equipment on the market today. All Reliance Electric control products are manufactured according to strict "world-class manufacturing" guidelines that ensure the highest product quality.

However, if the need ever arises, you can turn to Reliance Electric for expert service of your programmable controller or distributed control system. Our Digital Products Service Center has the experience and technical know-how to put your Reliance® control equipment in peak shape.

State-of-the-art equipment and a Reliance-educated technical staff means quality you can count on.

Service is performed in a static-controlled environment to ensure proper operating performance. We also have break-down and exchange service capabilities to meet your service needs.

Call toll-free: (800) 669-6119

Digital Products Service Center

Our Digital Products Service Center in Columbus, Ohio is the only place you can get factory-authorized service for your Reliance digital products:

- Reliance-trained technicians are experts in the repair of the most sophisticated PLC, DCS and motion control products.
- Remanufacturing is done to original factory specifications, including extensive component "burn-in" cycle testing.
- All components are remanufactured to latest-performance revision standards—at no extra cost. Only Reliance can offer this advantage.
- We provide the most comprehensive warranty in the business—one full year on the module, not just on the component repaired.
- Our toll-free phone is open 24 hours a day, seven days a week.

All remanufactured equipment is tested under various load conditions to verify standards.

At Reliance's Digital Products Service Center, only genuine Reliance parts are used — the parts specifically designed for your Reliance equipment.

Reliance Electric uses a wide array of the most sophisticated testing equipment available.
